

Local Mining News.

Mr. and Mrs. A. B. Daniels, of San Diego, are in Kingman. Mr. Daniels is operating the Atlantic-Pacific group of mines, at Thumb Butte, David Colyer being in charge of the work.

L. L. Stevens came in from Los Angeles Thursday morning and is hustling around getting everything in shape for the installation of the milling plant for the Williams tungsten mines, which he and associates recently took over.

J. C. McDowell, who is managing the properties of the Anozira Mining company, at Cerbat, was a Kingman visitor this week. Mr. McDowell is getting good results in the properties under development.

C. E. Hart, of Los Angeles, who has been looking over mining property in this section the past week, departed to his home a few days ago. While here he obtained options on the property of Philip Smith and others, in the McCannico section.

W. D. Grannis and S. W. Lockett were up from the mines of the Arizona Venture Corporation this week, returning to camp Thursday. The work of crosscutting to the vein at the lower level is well under way and it is expected to reach the ore by the first of the week.

Owing to an accident to their car, in the Grand Gulch region, County Engineer Wright and Chairman Walker, of the Board of Supervisors, had to return to St. George, from which point Mr. Walker took train for home. Mr. Wright in company of Walter Brown made the trip through Grand Gulch to Griggs Ferry, arriving Thursday night. The trip from St. George was made in two days, although the going was very rough. It is probable that with a locating engineer laying out the road a fairly good grade may be had through Grand Gulch to the north part of the county, but it does not appear to be a necessity at this time. A report will be made to the Board of Supervisors at its next meeting covering the trip and the possibilities of road and bridge building and actual conditions in the northern strip.

Mr. and Mrs. Osa Walker departed to Prescott yesterday to witness the Frontier Day festivities. Prescott is the old home of this estimable couple and they are sure to have a fine time.

Tennessee to be Electrified.

To show that the Tennessee mine is one of the big properties of the county we are able to give to our readers the fact that this big lead property is to be equipped with electric power, the juice to be sent out from Kingman. An electric hoister, compressor and pumps are to be at once installed and the mine equipment modernized in every particular. All the old machinery is to be torn out and the new equipment to be put in as soon as possible.

The Tennessee mine has reached the 1000 foot level and is going to the 1200 as fast as possible. It is said that the new levels have disclosed such ore bodies that make a new equipment imperative.

What is a Placer.

A placer is an unconsolidated deposit accumulated by mechanical processes, carrying one or more minerals in commercial quantities. All placers are secondary deposits—that is, the material of which they are composed was originally derived by erosion of bedrock. Although it is undoubtedly true that under certain conditions nuggets of placer gold have been enlarged through chemical precipitation, yet this action is a negligible quantity in placers. Placers may be derived solely by rock weathering without water sorting, but more commonly are the result of water transportation, sorting, and deposition. Many of the richest placers are those formed by the erosion of older placers and the reconcentration of their gold.

Sheriff Lane, who went up north ten days ago with County Engineer Wright and O. E. Walker, chairman of the Board of Supervisors, returned home from St. George, going out by way of Lund. He reports northern Mohave county and southern Utah quite prosperous, the new gold strike in Bull Valley attracting considerable attention to mining in that part of the State.

Are You Feeling Fit?

Do you envy the man or woman of untiring energy, strong body and happy disposition? All these depend upon good health, and good health is impossible when the kidneys are weak, overworked or diseased. Foley Kidney Pills act promptly and help the kidneys filter the blood and cast out the poisonous waste products that cause sore and swollen muscles and joints, backache, rheumatism, and the symptoms that give warning of dangerous kidney and bladder ailments. A large number of people from Kingman and outside camps are getting ready to make the trip to Prescott today and in the morning. A few days in the Mile High city will do any person from this region a great deal of good.

Mrs. M. E. Cohenour departed yesterday to Prescott, where she will help celebrate Frontier Day.

Traveling Man's Experience.

"In the summer of 1888 I had a very severe attack of cholera morbus. Two physicians worked over me from four a. m. to 6 p. m. without giving me any relief and then told me they did not expect me to live; that I had best telegraph my family. Instead of doing so, I gave the hotel porter fifty cents and told him to buy a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, and take no substitute. I took a double dose according to the directions and went to sleep after the second dose. At five o'clock the next morning I was called by my order and took a train for my next stopping point, a well man but feeling rather shaky from the severity of the attack," writes H. W. Ireland, Louisville, Ky. Obtainable everywhere.
